Rec. Mgmt 3-3

Chief, Supply Division

Attention:

Chief, Records Management Staff

Proposed Instructions for Field Stock Status Reporting

1. Your proposal to include filing equipment as a reportable item should provide this Staff with valuable planning data, and a means of measuring the effectiveness of an overseas records management program. However, if the instructions as now worded will not cover filing equipment that does not bear a stock number, I would suggest that paragraph 7 be reworded to provide for reporting these items by full description on Job Number 355-2 rather than solely by a local stock number.
